Computer Engineering Student

Phone: +216 24 643 784 | Email: [youssef.abidi@polytechnicien.tn](mailto:youssef.abidi@polytechnicien.tn) | Address: Grombalia, Nabeul, Tunisia  
LinkedIn: [linkedin.com/in/youssef-abidi-3546553b0/](https://www.linkedin.com/in/youssef-abidi-3546553b0/) | Portfolio: <https://youssefabidi911.github.io/Portfolio/>

## Summary

---

Motivated and detail-oriented Computer Engineering student with a strong foundation in programming, algorithms, and system design. Experienced in developing software applications using languages such as Python, C/C++, and SQL, with a solid understanding of data structures and database management. Skilled in problem-solving and analytical thinking, with hands-on experience through academic projects in areas such as software development, game programming, and database systems. Comfortable working both independently and as part of a team, with experience collaborating on socio-cultural and multidisciplinary projects. Passionate about technology, continuous learning, and applying engineering principles to solve real-world problems. Currently seeking opportunities to further develop technical skills and gain practical experience in the field of computer engineering.

## Technical Skills

---

- **Programming Languages & Frameworks:** Python, Java, C, C++, JavaScript, PHP, SQL, HTML5, CSS, Bootstrap
- **Database:** SQL Server, MySQL, Oracle, PL/SQL
- **Tools & Practices:** Git, Github
- **Languages:** Arabic Native, French: Intermediate, English: Upper-Intermediate, German: Elementary
- **Certifications:** IT Specialist - Python (Certiport, a Pearson VUE business)

## Professional Experience

---

### Electrical Engineering Intern (Final Year Project)

Tunisie Cables Company

February 2025 - May 2025

- Designed and modeled electrical systems for an extruder machine, including HMI development and PLC programming (Siemens TIA Portal, Ladder, SCL)
- Created a detailed coil quality report, identifying key parameters that improved product consistency and reduced rejection rates
- Collaborated with production teams to integrate automation solutions, resulting in more stable machine operation

### Trainee – Climate Cooperation Program (HITS Sidi Bouzid & Collège de Maisonneuve, Canada)

Higher Institute of technological Studies Of Sidi Bouzid & Collège de Maisonneuve, Canada

January 2025

- Developed a smart HVAC system allowing remote control of heating and cooling via smartphones, tablets, or voice assistants
- Integrated temperature, humidity, and occupancy sensors to automatically adjust climate conditions based on indoor/outdoor environmental data
- Implemented scheduled operation and automated scenarios (e.g., pre-cooling before arrival, energy-saving mode when unoccupied)

### Automation Intern

Tunis-Carthage International Airport

January 2024 - February 2024

- Verified VHF air-ground communication frequencies (118–137 MHz) using spectrum analyzers and portable aviation communication monitors
- Utilized RF signal generators to test receiver sensitivity of ground-based navigation aids (VOR/ILS)
- Measured signal deviation and interference patterns to ensure ICAO Annex 10 compliance
- Assisted maintenance team in inspecting electrical installations of communication ground stations

*January 2023 - February 2023*

- Designed electrical schematics for industrial control panels using AutoCAD Electrical, compliant with IEC 60204-1
- Developed and executed test plans using multimeters, insulation testers (megohmmeters), and variable DC power supplies
- Authored technical reports documenting test results, design choices, and improvement recommendations following ISO 9001 procedures
- Interpreted IEC 60617 symbols and NF C 15-100 installation standards throughout design and testing

## Education

---

### **National Engineering Diploma in Computer Engineer (EUR-ACE Label)**

*September 2025 - Present*

Polytechnic School of Sousse, Sousse Tunisia

- Relevant coursework: Data Structures & Algorithms, Database Systems, Operating Systems, Computer Networks, Software Engineering
- Developed academic projects in programming (Python, C/C++), game development, and database design
- Gained strong analytical, problem-solving, and teamwork skills through practical assignments and collaborative work

### **Bachelor's Degree in Electrical Engineering**

*September 2023 - Juin 2025*

Higher Institute of technological Studies Of Sidi Bouzid, Sidi Bouzid, Tunisia

- Major in Automation & Industrial Computing
- Acquired comprehensive knowledge in electrical systems, automation technologies, and industrial computing. Developed skills in designing and implementing automated systems, optimizing industrial processes, and integrating advanced control systems.
